

V&V5 — Operational Validity  
 $\chi^2$  + paired-t + Holm-Wilcoxon

Cochran's rule: Cochran's rule violated: 3 of 11 cells have expected count < 5 — [('I', 3.09), ('J', 4.63), ('U', 3.1)].  
Chi-square p-value is approximate; consider Fisher's exact or pooling low cells.
